From the Chairman of the Board of Trustees

Mehmet Ali Aydınlar
Chairman of the Board of Trustees

Dear Students,

Acibadem University is a large institution that reflects Acibadem culture, which consists of more than 30 years of knowledge and experience in health services, to the field of education. We have made a difference by reflecting our pioneering and holistic perspective, which comes from our experience in the health sector, to the training we offer. It is possible to see this difference at every point necessary for a student, from campus to laboratory, from teaching staff to social facilities. Because we see the university years as a holistic process in which our students are prepared not only professionally but also in every aspect of life.

The objective of our university since its establishment is to become one of the world's leading universities in health field, not only in Turkey. This objective is a passion for us! When you are enthusiastically attached to an objective, you will not only imagine the present but also the future, and you will shape every step you take, accordingly. We have also taken steps to turn our dreams into reality with great speed and continue in the same way...

One of the examples that reflects our claim to be the best in the world, not in Turkey, is the Clinical Simulation and Advanced Endoscopic-Robotic Surgery Training Center (CASE) with its advanced technology infrastructure and equipment. In fact, CASE is one of the two medical simulation centers in the world that received the "Center of Excellence" award by the CAE Healthcare Academy. Our success at CASE continues with two very important accreditations. CASE has been reaccredited by NASCE and SSIH. At the same time, due to its R&D activities, it received another specific accreditation given by SSIH in the field of "Simulation Research". Thus, CASE is the only simulation center in Europe accredited in these two fields. In addition to all these, it is one of the few centers in the world that has the title of "Global Training Center" and AAALAC accreditation in the field of robotic surgery. CASE continues to be the only center that offers clinical simulation, endoscopic-robotic surgery training and cadaver-based training under the same roof, and it introduces new training modalities every year thanks to its R&D studies on virtual reality and mixed reality serious game-based training modules makes available. Due to this equipment, CASE continues its activities as an attraction and reference center where not only our students but also thousands of experts from various countries are trained.

We continue to make great strides for scientific research; We are conducting research and studies that shape the future of medicine with the newly opened Biomaterials Application Research Center and Nanobiotechnology Laboratory.

We have shaped the training and the opportunities we offer not only for the present, but also for the needs of the future. We train our graduates as professionals sought by the industry. We also try to support our students in their career planning. Successful students targeting Acibadem Healthcare Group in their careers are prioritized in terms of employment within the group.

Our students and graduates, who evaluate the possibilities of Acibadem University, follow their dreams, and see university life as a part of their future, continue to make us proud with their success. While shaping your future, your choice of university will be an important turning point both in your life and in your career plan. I am sure that the effort you will make to reach your dreams and the knowledge you have gained at the university will guide you on this path.

I wish you all success.

Mehmet Ali Aydınlar
Chairman of the Board of
Trustees

From the Rector

Prof. Ahmet Şahin
Rector

Dear Students,

Acibadem University has had two major powers that have gained momentum for its establishment and development; the first is the desire to transfer the accumulated experience and knowledge gained while providing quality healthcare services in Acibadem Healthcare Group to the next generation. The second is the willingness of leading academicians of our country working in the group to contribute to the health sciences by educating students and conducting researches.

With our contemporary and research-oriented education programs, we aim to educate our students as well-equipped researchers, interrogators and productive healthcare professionals. We strive for our students to maintain their enthusiasm while starting university during their education life and reflect this passion in their professional life. In accordance with this purpose, we endeavor to provide our students with academic and social environment necessary for their professional and individual development.

While proceeding along your objectives, university life is an important step towards the future. University education, which is preferred in the light of specified objectives, will also lead you to success.

Therefore, research and gain information in university preference process for your future.

Because a healthy future is born from a strong preference.

Why

Acibadem University?

- A thematic university on healthcare
- Dynamic and contemporary educational programs
- Experienced academic staff
- Research focused university
- Advanced simulation in health education
- A city university which makes difference with its social facilities
- Close cooperation with health sector
- Success and support scholarship

- Computer Programming

* There is evening education in the relevant programs.

Academic Opportunities

Language of Instruction

ACIBADEM UNIVERSITY PREPARATORY ENGLISH PROGRAM (ACUPEP)

Students who will study in undergraduate programs whose language of instruction is English will take the Acibadem University English Preparatory Program Proficiency and Level Determination Exam (ACUPEP PPT) before the start of the new academic year. Students who have succeeded in taking at least 70 of this exam or who have the score and higher specified in the following exams are exempt from the English Preparatory Program.

English language proficiency students are placed in classes grouped according to the APPT results and receive education in the intensive English Preparatory Program. Undergraduate students who have successfully completed this program attend their departments.

EXAMS	MINIMUM SCORES	ACCEPTED VALIDITY
YDS/e-YDS*	85	5 years
PEARSON PTE Academic	67	2 years
TOEFL-IBT**	80 (Test) / 20 TWE	2 years
CAE	C	3 years

* Students who take 85 and above from the YDS and/or e-YDS exam must also take the ACUPEP PPT / ACCEPT speaking and writing exams and get at least 70 in order to be exempt from the Preparatory English Program.

**a) Institutional-based TOEFL exam (ITP) results are not accepted. Only the TOEFL-IBT results obtained from state universities' exam centers are valid.

**b) Students who have taken the TOEFL-IBT exam abroad and have a total score of 80 and above have also taken the ACUPEP PPT/ACCEPT speaking and writing exams, which will be conducted by the Department of Foreign Languages, the English Preparatory Program for the acceptance of the exam, and have at least 70.

UNDERGRADUATE AND ASSOCIATE DEGREE PROGRAMS

English language proficiency of the students in undergraduate programs with Turkish education language is determined by English Proficiency and Placement Test (APPT/Acibadem Proficiency and Placement Test).

New students enrolling at the university take APPT Exam before the academic year starts and are exempt from the relevant English course according to the result of this examination. Students who are not exempt take English lessons 5 hours per week according to their level. At the end of the first three years, B1 is the level of English language proficiency targeted by the successful completion of "General English" courses. All students take English / ESP Course for Special Purpose in the final year.

Education language of associate degree programs is Turkish. Vocational English courses are given to the students during the 3rd and 4th semesters.

Double Major/Minor

Acibadem University has a double major/minor program. Students have the opportunity to do a double major / minor in the departments that the faculties deem appropriate if they meet the necessary conditions.

Thus, students are eligible to graduate with two separate diplomas by taking simultaneous courses in a second undergraduate program in a double major program or to receive a minor certificate by taking the required number of courses from a second undergraduate program in a minor program.

CASE
Center of Advanced
Simulation and Education

The Most Comprehensive Simulation Center in the World

CASE

Clinical Simulation and Advanced Endoscopic - Robotic Surgery Training Center - CASE, Clinical Simulation and Advanced Endoscopic - Robotic Surgery Training Center - CASE, is the most comprehensive medical training center in the world with its departments and technological infrastructure. Pre and post-graduate training programs are carried out at the center where a special education model is applied with simulated patients, electronic learning and skill laboratories and advanced technological medical simulators. Center consists of two departments as Clinical Simulation Training Center and Advanced Level Endoscopic - Robotic Surgery Training Center. Clinical Simulation

Training Center uses a blended training methodology for students with electronic learning, simulated patients and simulation applications. Medical simulation training is used in conjunction with training modules in the virtual reality laboratory. In the Clinical Simulation Training Center, designed as a virtual hospital, students are prepared for the internships in clinical training by implementing different crisis scenarios. Postgraduate specialist training is carried out at the Advanced Endoscopic - Robotic Surgery Training Center, established to develop the skills of specialist surgeons in the field of endoscopy and robotic surgery.

CASE has been re-accredited in the field of core accreditation and medical simulation R&D studies by **Network of Accredited Clinical Skills Centers of Europe (NASCE) and Society for Simulation in Healthcare (SSH)**. CASE has the title **“Global Training Center”** in the field of robotic surgery. CASE is one of the two medical simulation centers in the world awarded with **“Center of Excellence”** by CAE Healthcare Academy. In addition, our center is one of the centers which has **AAALAC (The Association for Assessment and Accreditation of Laboratory Animal Care)**.

LIBRARY

Acibadem University Library provides many printed and electronic resources supporting academic programs and scientific researches. The collection mainly consists of resources on health sciences.

INTERNATIONAL OPPORTUNITIES

Acibadem University is a member of the European Union Erasmus + Exchange Program. Within the scope of the program, students can study in contracted countries and universities, perform internship activities at an enterprising business, a research institute, a laboratory, an organization or another relevant place of study abroad with internship mobility.

Countries Where There are Bilateral Agreements:

- Estonia
- Croatia
- Netherlands
- Spain
- Sweden
- Italy
- Lithuania
- Macedonia
- Norway
- Poland
- Romania
- Slovenia
- Greece

“ I did an internship at Radboud University for two months. I worked on a research project during my internship and made my research presentation at the end of the internship. In addition, during the clinical visits included in my program, I had the opportunity to observe the practice of medicine there, and in the conversations we had, I learned a lot of things about the health care system in the Netherlands, medical education. When my two full months came to an end, I found that I had achieved much more than I had initially imagined. Every person I know has taught me something different, and I'm with each. I've seen how much my world has expanded. I have worked, done a lot of research, and I have visited a lot of places, rested, had fun. I would recommend such an experience to anyone. Everyone will discover different things in themselves and will return by learning different things. I am sure of that. ”

Career Opportunities

Acibadem University supports students preparing for professional life during university life by offering internships and part-time job opportunities with close cooperation with health sector.

INTERNSHIP OPPORTUNITIES

The university has compulsory internship programs. Internship organizations are organized in accordance with the program schedule determined by the faculty /department / programs at the beginning of the semester.

PART-TIME WORK

Thanks to the close cooperation of the university with the health sector, students can get the opportunity to work part-time and part-time in different fields in accordance with their needs while the learning processes are ongoing.

CAREER COUNSELING SERVICE

Thanks to the Career Counseling Service, which every student can easily access, students can conduct career interviews, contribute to self-knowledge with personality and foreign language inventories, determine the aspects that students need to improve, and provide educational guidance and if there are work requests, they can be evaluated.

TRAINING FOR THE PROFESSIONAL LIFE

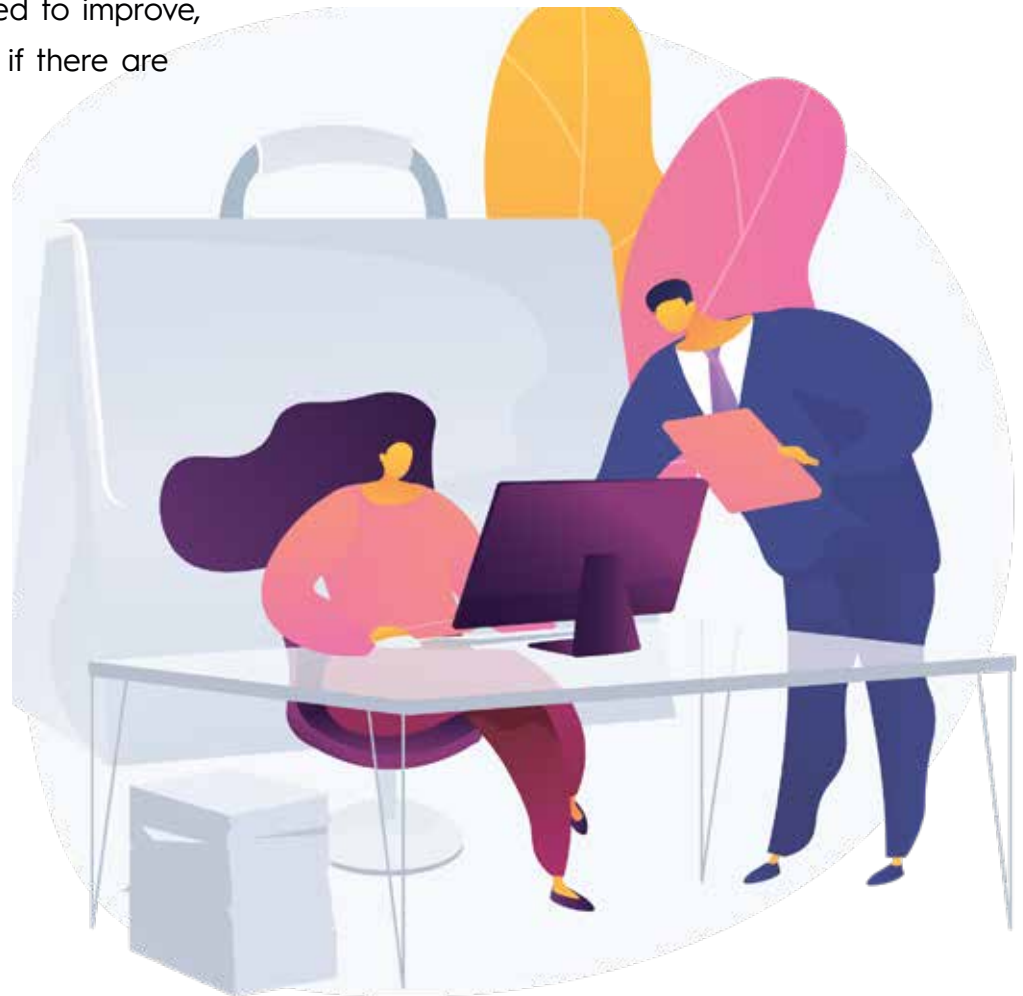

Within the scope of the collaborative work of the University Human Resources and Career Development Directorate and Acibadem Health Group, professional life preparation trainings such as “Interview Techniques, Linked-in, Communication, Presentation Techniques Training” are provided.

MANAGER GATHERINGS

By bringing managers and students together through career meetings, students are given the opportunity to benefit from the experiences of professionals in their field and ask them questions.

JOB OPPORTUNITIES AFTER GRADUATION

During the graduation period, one-to-one interviews are conducted with all graduates. As a result of these interviews, interview processes are organized with recruitment teams in order for our graduates to be evaluated for open positions within the Acibadem Healthcare Group.

University Education and Research Hospitals

ACIBADEM UNIVERSITY

ATAKENT HOSPITAL

ACIBADEM UNIVERSITY ATAKENT HOSPITAL, WHICH WAS PUT INTO SERVICE IN 2014, HAS AN INDOOR AREA OF 60.000 M² AND A CAPACITY OF 262 BEDS. HOSPITAL PROVIDES SERVICE FOR 400,000 PATIENTS EACH YEAR ON AVERAGE. HOSPITAL HAS SPECIALIZED CENTERS WHERE DIAGNOSIS AND TREATMENT METHODS ARE APPLIED WITH A MULTIDISCIPLINARY APPROACH WITH SEVERAL MEDICAL DEPARTMENTS UNDER A SINGLE ROOF.

ACIBADEM UNIVERSITY

MASLAK HOSPITAL

ACIBADEM UNIVERSITY MASLAK HOSPITAL, WHICH WAS OPENED IN 2009, HAS A CLOSED AREA OF 106,000 M² AND A CAPACITY OF 364 BEDS. THE HOSPITAL SERVES AN AVERAGE OF 465,000 PATIENTS EACH YEAR.

IN ADDITION TO HAVING UNITS AND CENTERS IN MANY DIFFERENT FIELDS, THE HOSPITAL OFFERS HEALTH SERVICES WITH A MULTIDISCIPLINARY UNDERSTANDING AND ALSO HAS ALL THE NECESSARY EDUCATIONAL ENVIRONMENTS FOR THE EDUCATION OF FUTURE HEALTH PROFESSIONALS.

Cooperation With Acibadem Healthcare Group

Acibadem University students have the priority of doing internships in Acibadem Healthcare Group hospitals.

Incubation Center

Acıbadem University Incubation Center provides support in learning, implementation and business planning processes within the scope of developing business ideas that will serve the development of the health sector in turning ideas and projects into reality. Business ideas and projects supported by the center are: education, health experts and academics in the field of mentoring, office facilities, copyright services, prototyping services are also available to support access to potential customers and business partners.

The Center supports entrepreneurs nationally and internationally and strengthens the entrepreneur's company in terms of sustainability with the opportunity to expand abroad, investor meetings and access to customers.

BIODESIGN Center

Acibadem University Biodesign Center aims to be a leading center that supports domestic medical technologies by providing interdisciplinary coordination, experience and information sharing necessary to create the value of medical innovation that can put it ahead of the competition in the world market.

It is a center that works to improve the efficiency of diagnosis, treatment and care processes through medical innovation. Our Center; the academy has a working understanding of the healthcare industry, combining projects that arise from the needs and ideas of the manufacturing industry with industrial design and many engineering disciplines to achieve results.

The projects accepted to the center are provided with support for the design of medical instruments and the development of innovative solutions in the field of health.
