# OPPORTUNITIES AT POLYU

## Artificial Intelligence & Data Analytics and Innovation & Entrepreneurship

PolyU launched a new *departmental scheme-based admissions* arrangement in the 2022/23 academic year that gives students the flexibility to choose their major at the end of Year 1. Two new elements, "*Artificial Intelligence and Data Analytics*" and "*Innovation and Entrepreneurship*", have been included in the new 4-year undergraduate curriculum. They help to broaden students' perspectives, enrich their academic knowledge, increase their competitiveness and better equip them to meet society's needs.

## Work-Integrated Education

The Work-Integrated Education (WIE) component of undergraduate education at PolyU *requires all students to complete at least one internship, either local or overseas, that is relevant to their major*. The work-based learning experience ensures that students develop generic skills that will be valuable in their future professions.

## Signature Summer Programmes

Our robust network of universities and institutions allows us to offer a series of signature programmes, such as the *UG Summer Research Abroad Sponsorship (USRA)* and *Summer@OxBridge*, which encourage students to spend a few weeks during university breaks to learn outside local classrooms and gain global exposure. USRA provides financial support for high-achieving students to undertake research under the guidance of academics at leading overseas universities, while Summer@OxBridge, hosted by the *University of Cambridge* or the *University of Oxford*, enables adventurous students to expand their intensive study opportunities in another city and in a unique academic environment.

## Student Exchange Programme

PolyU provides different global learning experiences for students. It has established a *partnership network with 270+ universities and academic institutions across 37 countries / regions*. Hundreds of our undergraduate students choose to study at one of our partner institutions for a semester, a summer term and / or a clinical placement.

## Service-Learning

Service-Learning (SL) *embeds social responsibility in the fabric of the University*. SL provides students with opportunities to serve the underprivileged, using their professional knowledge and skills in service locations such as Hong Kong, Mainland China, Taiwan, Cambodia, Indonesia, Myanmar, Vietnam and Rwanda.

## Leadership Programme

PolyU's Leadership Programme offers *credit-bearing courses with content ranging from corporate leadership to interpersonal development*. Every year we welcome more than 2,000 students to embark on the journey of becoming future global leaders.

## STUDENT SHARING

### Zaidi Syed Muhammad Askar Hussain

BSc (Hons) in Computing and AI

PolyU first came to my attention through social media posts and personal recommendations, which in turn led to research that solidified my decision to choose this University. PolyU fosters a vibrant and inclusive learning environment and is equipped with modern facilities and serene spaces for connecting with global friends. Also, PolyU's primary focus on research and innovation perfectly aligns with my aspiration to use technology for positive change.

What particularly stood out to me was PolyU's robust network of collaborations with industries and universities, both locally and internationally, which allow it to offer exceptional opportunities for academic and cultural exchange as well as Work-Integrated Education, which provides students with hands-on experience.

Looking ahead, I am committed to engaging with diverse communities worldwide and making globally impactful technological contributions. PolyU provides an ideal setting to prepare me for multiple career paths that lead towards my educational and career aspirations.

### Charis Ngok

BSc (Hons) in Occupational Therapy

The reason I initially chose to study at PolyU is simple: I was interested in occupational therapy, and PolyU is a high-ranking university that provides top-tier occupational therapy education in Hong Kong. My years at PolyU have proven that it was what I was looking for. PolyU educates students on the application-based. The occupational therapy curriculum includes 1,000 hours of placements in different settings, which has allowed me to experience multiple fields and consider which one I would like to pursue a career in before I graduate. Also, in our daily classes, we study many cases and learn how to apply the therapies to real clients.

In addition, PolyU provides a wide range of extracurricular activities, like different societies, volunteer experiences and healthy lifestyle lessons. I have gained new skills and expanded my social networks through these experiences. I joined the English Drama Club and several entrepreneurship societies, where I learnt how to communicate with people who have different personalities and how to organise activities. I am glad to have had such a rewarding university life at PolyU.
